Summary	Results-driven Data Engineering and Project Management professional with 5+ years of experience designing and delivering scalable data systems and leading Digital Twin and SaaS initiatives. Proven expertise in Python, Kafka, Delta Lake, gRPC , and AWS cloud deployments . Skilled at bridging business needs with technical execution, optimizing data workflows, and managing end-to-end delivery of enterprise applications. Adept at Agile methodologies, CI/CD practices , and cross-functional team leadership.	
Experience	EinNel Technologies Data Engineer & Project Manager – Software Development Digital Twin Projects 1. Boiler Digital Twin Role: Data Engineer & Project Manager - Designed and implemented the overall system architecture and database/storage planning. - Developed Python APIs for real-time data integration and analytics. - Managed the full project lifecycle from inception to delivery, ensuring alignment with business needs. - Facilitated end-user interactions to gather requirements and provide solutions. - Led team management, task allocation, and delivery oversight. 2. Copper Twin (Proof-of-Concept & Application Development) Role: Strategic Planner, Tech Lead & Project Manager - Involved from scratch, contributing to business-level decision-making and product strategy. - Optimized data pipelines using Kafka, Delta Lake, and gRPC for high-performance processing. - Defined the technology stack (Python, Polars, Delta Lake, gRPC) and data storage architecture. - Managed project execution, milestones, and delivery timelines. - Mentored team members and provided technical guidance during critical phases. - Developed POCs to validate architecture and functionality. - Oversaw database management and API development for modular expansion. - Acted as a bridge between business stakeholders and technical teams. SaaS Application Projects Role: Project Manager & Database Specialist - Provided end-to-end project oversight across multiple SaaS applications: Church Management Application Task – HR & Employee Management Application Laboratory Management Application Donor Management Application - Engaged with end users for feedback, requirements gathering, and support. - Conducted change request analysis and evaluated feasibility/impact. - Handled database administration and schema optimization for performance. - Contributed to feature change analysis and development strategy planning. - Played a key role in crisis control where delivery timelines were impacted due to business deviations, ensuring corrective measures and smooth delivery. - Coordinated with cross-functional teams to align business needs with technical execution. - Oversaw team performance and guided delivery in an agile environment. Sicagen India Ltd Graduate Engineer Trainee - Have performed installation, testing and maintenance of speed governor in diesel generator and turbine. - Provided expertise to establish pre-commissioning processes according to the client’s requirements as identified in the technical specification and contractual scope of work. - Supervised pre-commissioning subcontractor activities by attending weekly progress meetings, reviews their deliverables and progress reports, check their readiness prior to pre-commissioning processes and prepares the commissioning schedules. - Commissioned Governor and Controller at MADRAS ATOMIC POWER STATION (MAPS), Kalpakkam. - Sales and service of electronic speed governors for 25+ power plants and process plants across south India.	March 2021 – Present Chennai Jun 2018 – May 2019 Chennai
Education	Prathyusha Engineering College 7.06	2018 Bachelor’s in Electrical and Electronics Engineering
Skills	- Data Engineering & ETL Pipeline Development - Data Modeling & Warehousing - Digital Twin Implementation & Optimization - API Development (gRPC, REST, WebSocket) - Cloud Deployment & Scalability Planning - Project & Team Management (Agile/Scrum) - SaaS Application Development Oversight - Business & Product Development Strategy - Cross-functional Team Collaboration - End-to-End Product Delivery Ownership - Client Engagement & Requirement Gathering - Crisis Management & Timeline Recovery - Application Development (Python – backend focus)	
Technology Stack	- Programming & Scripting: Python, SQL - Cloud Computing - Azure Data Factory - Azure Databricks - AWS Glue - AWS Lambda - Data Processing: Polars, Pandas, Delta Lake, PySpark - Streaming & Messaging: Kafka, MQTT, Redis - Databases: PostgreSQL, Cassandra, SQL Server - APIs & Frameworks: gRPC, FastAPI, Flask, REST API, WebSocket - Workflow & Orchestration: Apache Airflow - Cloud & Deployment: AWS (EC2, ECS, S3), Docker, Kubernetes - Version Control & CI/CD: Git, GitHub Actions - Monitoring & Logging: Prometheus, Grafana, ELK Stack
